VRey®

Uterine Fibroid Radiofrequency Ablation

Training Course

The technique of Transvaginal Radiofrequency Ablation for Uterine Fibroids was developed in 2015 by **Dr. Victoria Rey** in Seville. The use of this technique has made it possible to avoid surgery and hysterectomy in many cases of women with symptomatic fibroids. The training always given directly by **Dr. Rey** in our center has made the technique spread and consolidated among professionals around the world, growing exponentially in recent years.

The **VRey®** method describes the technique to treat fibroids by radiofrequency using the transvaginal approach, ultrasound-guided, minimally invasive route. During the training you will learn the basics of the technique, the method of approach for the complete treatment of fibroids, the precise indications, the expected results and the experience of **Dr. Rey** in the use of this technique. The theoretical training will be accompanied by practical training in the phantom model and the observation of practical live cases in the operating room with **Dr. Rey**.

The program will start at 9:00 a.m. and it will end at 18:00 h in the facilities of Clínica Victoria Rey, in Luis Montoto 81, Seville.

The program is as follows

- **9:00 / 10:00** Theoretical training: basics of radiofrequency technique
- **10:00 / 13:00** Practical live cases in the operating room
- **13:30 / 14:30** Lunch
- **14:30 / 15:30** Theoretical training: Protocol, results and experience
- **15:30 / 17:30** Practical training in phantom model
- **17:30 / 18:00** Closing and conclusions
